Class Birthdays

8th - Ella Bardin

Room 124:

Goodbye, October. Hello, November! This month is packed with lots to do. We are wrapping up the second half of module 2 in math. These topics will include rounding on a vertical number line and two-and three-digit addition and subtraction using the standard algorithm. Our science rotation is continuing with life science and studying how organisms interact and survive in their ecosystems. During reading we are finishing thinking strategies. Then moving to informational text structure. In writing, we are starting our "Ouch" stories and researched based writing paired with reading. Social studies will be shifting from branches of government to types of government around the world. Student created study guides will start coming home to study for the assessment.

Thanksgiving Luncheon

Mark your calendars! Thanksgiving Luncheon is November 14th. The school requests, due to seating availability, to restrict each student to one visitor. Also, consider donating a tip to the eighth grade servers. This is one of their fundraisers each year.

Parent Check:

I would like to see if families are reading our monthly newsletter. Please sign on the line below. Your child will receive a prize if this is signed and returned Wednesday morning. (Prizes will not be awarded after Wednesday morning. Newsletters will be returned the same day.)

Special Thanks!

Thank you to the parents who made our fall party a success! There was a great combination of food, treats, games, and craft time. We appreciate all of your hard work and time you all spent preparing for the day. We had a blast!

Furthermore, **thank you** to everyone for my birthday gifts! I appreciate everyone's generosity and well wishes as I turned another year older.
